🔧 Skills

🔗 Frontend

Intermediate

React, Next.js, Tailwind CSS, Shadcn UI, Framer Motion, Responsive Design, State Management, API Integration

🔗 Backend

Intermediate

Node.js, Express.js, RESTful APIs, API Design, Authentication, JWT, Role-Based Access Control

🔗 Programming Languages

Advanced

Python, TypeScript, JavaScript (ES6+), HTML5

🗄 Databases

Advanced

MongoDB, Mongoose, Firebase

☁ Cloud & Deployment

Advanced

Vercel, Render, Firebase

🔗 Engineering Practices

Intermediate

TypeScript, Agile/Scrum, Code Reviews, Reusable Components, API Integration, Responsive Development, Performance Optimization

📋 Summary

Full Stack Developer and Frontend Engineer with **3+ years of hands-on experience** building and shipping production web applications using **React, Next.js, TypeScript, Node.js, Express.js, and MongoDB**. Experienced in developing responsive user interfaces, RESTful APIs, authentication systems, database architectures, reusable component systems, and performance-focused web applications.

Delivered solutions across **fintech, e-commerce, enterprise, rental, and business platforms**, with measurable results including **40% faster data loading, 30% faster feature development, 25% higher client satisfaction, 45% increased mobile engagement, and 30% lower bounce rates**. Comfortable owning features end-to-end, from translating Figma designs and implementing frontend architecture to designing APIs, database schemas, authentication, deployment, and production optimization.

🎓 Education

Bowen University

Software Engineering

Concentration in Software Development. Relevant Coursework: Software Architecture, Computer Graphics, Artificial Intelligence, Requirements Engineering, Software Engineering, Data Structures & Algorithms

Bachelor of Science • 4.43 GPA

Osun State, Nigeria • 2022 - 2026

📁 Experience

EASYSPEND

Frontend Engineer

Lagos, Nigeria

Apr 2026 – May 2026

- Developed and shipped **production-ready fintech interfaces** using React, TypeScript, and Tailwind CSS, translating Figma designs into responsive, reusable components.
- Integrated frontend features with **RESTful backend services**, implementing robust loading, error, validation, and empty states for reliable user experiences.
- Built responsive interfaces across different screen sizes while maintaining consistent component structure and visual fidelity to product designs.
- Delivered production features within **short sprint cycles** while collaborating with a fully remote engineering team.
- Applied reusable frontend patterns and TypeScript-based development to improve maintainability and reduce implementation inconsistencies.

📁 Experience

INTPLUS NIGERIA

Lagos, Nigeria

Frontend Engineer

Mar 2025 – Aug 2025

- Built and shipped **15+ responsive frontend interfaces** for enterprise clients using React, TypeScript, and Tailwind CSS, contributing to a **25% increase in client satisfaction**.
- Integrated frontend applications with RESTful APIs and optimized data-fetching strategies and caching, reducing **data loading times by 40%**.
- Designed and implemented a reusable **Shadcn UI component system**, reducing development time for new features by **30%** through component reuse and standardized UI patterns.
- Translated product requirements and Figma designs into responsive, production-ready interfaces while maintaining consistency across client projects.
- Collaborated with **5+ cross-functional team members** during Agile development cycles, contributing to feature planning, implementation, testing, and code reviews.
- Maintained a **95%+ code review approval rate** by following established coding standards, reusable patterns, and review feedback.
- Debugged frontend issues using browser developer tools and API testing workflows to improve application reliability and user experience.

J3 RENTALS

Remote

Full Stack Developer

Aug 2023 – Sep 2023

- Architected and delivered a **full-stack rental e-commerce platform supporting 200+ products**, combining a responsive Next.js frontend with a Node.js/Express backend.
- Developed product discovery features including **search, filtering, product browsing, authentication, and rental workflows**.
- Designed and implemented a custom **RESTful API with 12+ endpoints** using Node.js and Express.js for rental operations, payments, and user data.
- Designed MongoDB data models and integrated Mongoose for structured persistence and efficient database operations.
- Implemented frontend-to-backend API integration with appropriate handling of loading, validation, and error states.
- Deployed the frontend to **Vercel** and backend services to **Render**, achieving approximately **99.5% uptime**.
- Optimized application performance to achieve an average page load time of approximately **2 seconds**.

🏆 Awards

Final Year Project — Grade A

July 2026

Bowen University

Developed an attention-based deep learning model for lumbar spinal stenosis classification using medical imaging data, and awarded upon completion.

<> Projects

AMPERSAND

Full Stack Developer

- Built a client-facing rental management dashboard for managing **50+ rental services** and tracking real-time availability.
- Developed the application backend using **Node.js, Express.js, and MongoDB**, supporting booking and availability workflows.
- Designed API integrations between the frontend dashboard and backend services to support rental management operations.
- Took ownership of full-stack implementation across frontend architecture, API integration, database interaction, and deployment.

LOCKSEC

Full Stack Developer

- Led the full-stack development of an **8-page security platform**, coordinating implementation across frontend and backend functionality.
- Designed MongoDB schemas to support application data requirements and backend workflows.
- Established **type-safe API contracts using TypeScript** across frontend and backend services.
- Coordinated project implementation and maintained consistency between UI requirements, API structures, and database models.

ANTLIAS MERCHANT

Full Stack Developer

- Developed a **10+ page merchant platform** supporting product listings, inventory management, and order workflows.
- Built RESTful backend services using **Node.js and Express.js** with MongoDB for persistent application data.
- Implemented **JWT authentication and role-based access control (RBAC)** to secure protected application functionality.
- Integrated frontend workflows with backend APIs to support merchant operations across listings, inventory, and orders.

CAMPUS CONNECT

Founder & Lead Full Stack Developer

- Designed and developed a full-stack social platform for university communities, enabling students and alumni to connect, share posts, discover events, promote businesses, and participate in campus discussions.
- Built the platform using **Next.js, React, TypeScript, Node.js, Express.js, MongoDB, and Tailwind CSS**, covering frontend architecture, backend APIs, database design, authentication, and deployment.
- Implemented core social features including **posts, comments, events, anonymous discussions, student business listings, leaderboards, streaks, and verified badges**.
- Designed role-aware user flows supporting **students, alumni, companies, and general users**, with account verification and profile management workflows.
- Developed reusable UI components and responsive interfaces optimized for mobile and desktop experiences.
- Built RESTful API integrations for user management, posts, comments, events, business listings, and engagement features.

👤 Volunteer

Bowen Tech Week Volunteer

may - june 2026

Osun State, Nigeria

- Supported the planning and execution of **Bowen Tech Week**, contributing to the coordination of technical events and activities for participating students.

ANVIL BUILD CYCLE

June 2026 - present

Backend Developer

- Collaborated with a multidisciplinary team of students through a **six-week MVP development cycle**, turning a real-world problem into a functional software product
